Corporate Profile.

In 2001 Easytrans24.com was founded as an explicitly online based translation agency and it is still a private, owner-operated company today. The corporation is one of the top-providers in a largely saturated market. An attractive pricing structure, immediate cost assessment via internet and an extensive service portfolio under one roof characterizes the company.

Customer satisfaction is our first priority. To achieve this, all projects are subject to the Easytrans24 policy. This ensures that

- only professional certified translators and native speakers are working on your projects.
- all translations are in compliance with DIN EN 15038 (Reg.-No.: 7U286) standard,
- translations are subjected to a 2-step correction process prior to final delivery to correct potential errors immediately and
- every order is handled by a responsible expert who accompanies the project from start to delivery.

Easytrans24.com takes quality assurance a step above the four-eye principle. Managing Director Yigit Aslan states „Prior to joining our team, each translator undergoes an extensive and strict testing procedure. The applicant is required to translate a sample text for each professional field in which she or he would like to participate and receive an excellent or good rating“.

In addition to translations, our service spectrum also includes proof reading- and editorial work, referral of interpreters, as well as layout design and print (Desktop Publishing, DTP). Desktop Publishing especially, is a practical feature for our clients. The translation can be inserted in brochures, advertising posters or informational materials and send to the printer immediately.

The company employs professional native speakers and certified translators to process the requests. Easytrans24.com works with several hundred specialist from all over the world and therefore has access to a broad spectrum of professional areas. The company offers eleven main categories such as lifestyle, industry and commerce or the medical field etc., these are divided into specific sub-categories from which the customer can make his/her individual selection. A translator is able to translate a maximum of 2000 words per day, which is equal to approximately five DIN A4 pages of text.

Press-Info

Customers can place their requests at any time, day or night with the aid of the online-calculator on www.easytrans24.com and display the projected cost within a few seconds. Not only is this on-line tool multilingual; more specifically, you can enter as many languages as you desire, but it is also multi-compatible. In addition to all common file-formats (DOC, RTF, PDF, TXT), the online calculator also recognizes complex Excel files with multiple tabs and references.

Due to the great success in the German speaking countries Easytrans24.com is now exploring foreign countries as well. A subsidiary has been opened in Istanbul in December of 2010 and additional ventures in Europe and the USA are in the planning stages.
